“HEAT-STOP” HEAT RESISTANT INSULATING PASTE

*MALLOY makes
maintenance*

**EASIER, FASTER and
MORE RELIABLE**

to significantly

**LOWER COSTS
SAVE PARTS and
REDUCE DOWNTIME**

- *Protects all materials from heat up to 1650°C.*
- *Quickly absorbs & dissipates heat keeping its shape.*
- *Doesn't contain any toxic elements.*
- *Adheres to all surfaces without staining.*

900

SPECIAL ADVANTAGES

Malloy “HEAT-STOP” is an insulating paste developed to avoid any damages caused by heat

- It really absorbs and dissipates heat generated during welding or other jobs.
- It is a jelly-like, easy to mold but keeps its shape even at elevated temperatures.
- Can be used also a jigging-fixturing compound, for positioning parts to be welded.
- Avoid heat sensitive parts dismantling prior welding-saving you time and money.

SUPERIOR PROPERTIES

- Very high temperature resistance, up to 1650 °C.
- It doesn't contain any toxic substances, and doesn't release any unpleasant odor or irritating smoke.
- Adheres to all materials, included metal, plastic, rubber, glass, wood, fabric, plated or varnished parts.
- It is easy removable and doesn't leave any stains.

APPLICATIONS

Malloy “HEAT-PASTE” offers all its advantages in these cases:

During brazing or welding to avoid damages caused by heat like: warping, stress distortion, crystallization, tempering, collapsing, burning and discoloration on stainless steels, etc.

A thin layer Malloy 900 enable to weld or braze thin gauge sheet or tubes, avoiding heat damages on electrical cables, soldered joints, rubber gaskets, chromed or painted finishing, etc.

*For information about MALLOY products applications, or solutions for your specific problems, don't hesitate to contact us via web: www.malloy.it, or e-mail: info@malloy.it, or your local distributor.
We will be glad to do our best in assisting you.*
